

Information and consent form for the research project: "EEG gamma activity entrainment by periodic visual stimulation in sleep"

Consent form

I have obtained and read the written information and consent form for the above-mentioned study. I have been informed in detail in writing and verbally about the purpose and the course of the study, the benefits and risks of participation, the rights and obligations. I had the opportunity to ask questions. These were answered satisfactorily and completely. In addition to the written information, the following points were discussed:

I have been informed that my participation is voluntary and that I have the right to withdraw my consent at any time without giving reasons and without incurring any disadvantages.

Consent to data processing

The processing and use of personal data for the above-mentioned study will be carried out exclusively as described in the section "Information on data protection".

I also expressly consent to the use of the personal data for further research purposes outside this study, as described in the section on data protection.

☐ Yes, I agree to the extended use.

☐ No, I do not consent to the extended use. Participation in the study is nevertheless possible.

I hereby voluntarily consent to participate in the above study and to the processing of my personal data as described.
